Fact Magazine

PROJECTS

Treble.fm - For musicians, collaboration is essential. But finding the right people to work with isn't always easy. Our goal is to end this for good. Treble gives artists easy access to all the resources required in today's industry to create and promote the best music possible, from Production, Mixing, and Mastering, to Album Art, Press Photos, and Video. *Sketchapp*.

Brewmetrics - BrewMetrics is a mobile app that measures the logistics of your beer drinking habits and the habits of your friends. Update your beverages in real time and keep track of money spent, drinks had, and your current drink status. *Built in React Native*.

Upright- Designed a platform that connects clients with freelancers for small jobs, helped match potential freelancers to projects for Upright, and make Upright's search for freelancers more efficient. *Sketchapp/InVision*.

Neuportpleasure.com - Site for Music Producer, Neuport. *HTML/CSS/JavaScript/API*.
